Field Work

Forest Project
at Wave Hill
Field Work

- Crews consist of six to seven interns, each led by a Crew Leader.
- Each crew conducts field work at an assigned worksite.
- Work assignments include trail maintenance, erosion control, invasive removal and planting and caring for native plants.
Field Work and Worksites

• This is a map of the woodland worksites.
• Interns develop an in-depth understanding of their particular site and the problems it faces.
• They learn about changes that have taken place over time as they work to develop long-term restoration strategies.
