Welcome!

Dear Members and Friends,

Some of my fondest moments at Wave Hill have been in winter. For me, the subtle tones of the season come together in a kind of symphony for the senses—the long, sharp light that carves deep shadows on the ground, the sparks of color from dogwood and witch hazel, the chatter of wind in lingering leaves and the scent of conifers. As I wander, watching cardinals and blue jays harvest berries from the viburnums, the garden seems quiet but it is far from still.

Inside, visitors sit in The Café with steaming mugs and write or read or talk. The gardeners are busy in the glass houses cultivating plants for the coming season. The staff is hard at work planning programs and everywhere across the grounds the natural world is storing strength for the changes to come.

Winter is the season that teaches us about change. It shows us how to put down roots, gather energy, shed what is no longer needed and wait for the return of the sun.

So come to Wave Hill this winter. Take a walk under the bright sky. Listen to the garden’s clock wound up tight, tick, tick, ticking toward transformation. And get ready for the exhilaration of change.

— KAREN MEYERHOFF, President & Executive Director

“Being here during the Winter Workspace was very special to me. I was living in a small, dark apartment and then I would commune here to Wave Hill and work out of this beautiful Sunroom where the light was just magical. I would come and be here all day, soaking up the sun, working with industrial felt.”—MARIA HUPFIELD, 2013

Hibernators Hygge Weekend
SAT, SUN, FEBRUARY 1, 2

Symbiosis Scenes
SUN, DECEMBER 1
Symbiosis is everywhere! Create scenes of symbiosis in a diorama to highlight your favorite plant or animal partnerships.

Transformational Terrariums
SAT, SUN, DECEMBER 7, 8
The author Ahrundati Roy tells us that “a new world is not only possible, she is on her way. On a quiet day I can hear her breathing.” How will you bring your imagination to a vision of the kind of world we can create together? Use natural materials to create your very own mini-terarium from upcycled glass jars.

Self-Portraits: Follow My Tracks
SAT, SUN, DECEMBER 14, 15
Just like us, animals leave tracks behind as they move around on Earth. Create your own self-portrait from the tracks that you leave behind, remembering all the places you’ve been and the memories you hold.

Chasing-Light Poetry Catchers
SAT, SUN, DECEMBER 21, 22
Use flower petals and other natural materials to create celestial scenes that capture light on the longest night of the year. Come together to tell stories and create poetry welcoming winter, and create a three-dimensional light catcher infused with your own found poetry.

No Family Art Project
SAT, SUN, DECEMBER 28, 29
SAT, SUN, JANUARY 4, 5
Cyclical Calendars and Fractal Phenology
SAT, SUN, JANUARY 11, 12
Get intentional about how you want to spend the new year. Look to the moon, seedlings that bloom and seasonal cycles to chart your own growth, mimicking nature’s own processes.

Freedom Quilters of Gee’s Bend
SAT, SUN, JANUARY 18, 19
In 1966, Dr. Martin Luther King, Jr. visited the Gee’s Bend Community in rural Alabama and the Freedom Quilting Bee was established. These now famous quilts would later fund aspects of the community’s freedom. Create your own brilliant compositions out of bountiful squares of donated fabric to honor Dr. King’s birthday and the inspiring women quilters of Gee’s Bend.
