

# *Welcome to Wave Hill!*

Our gardens and woodland are full of all kinds of amazing plants, insects and animals. This activity asks you to become a detective, using your five senses to discover what lives at Wave Hill. Then, on the back, you can use art to express what you found during your exploration!

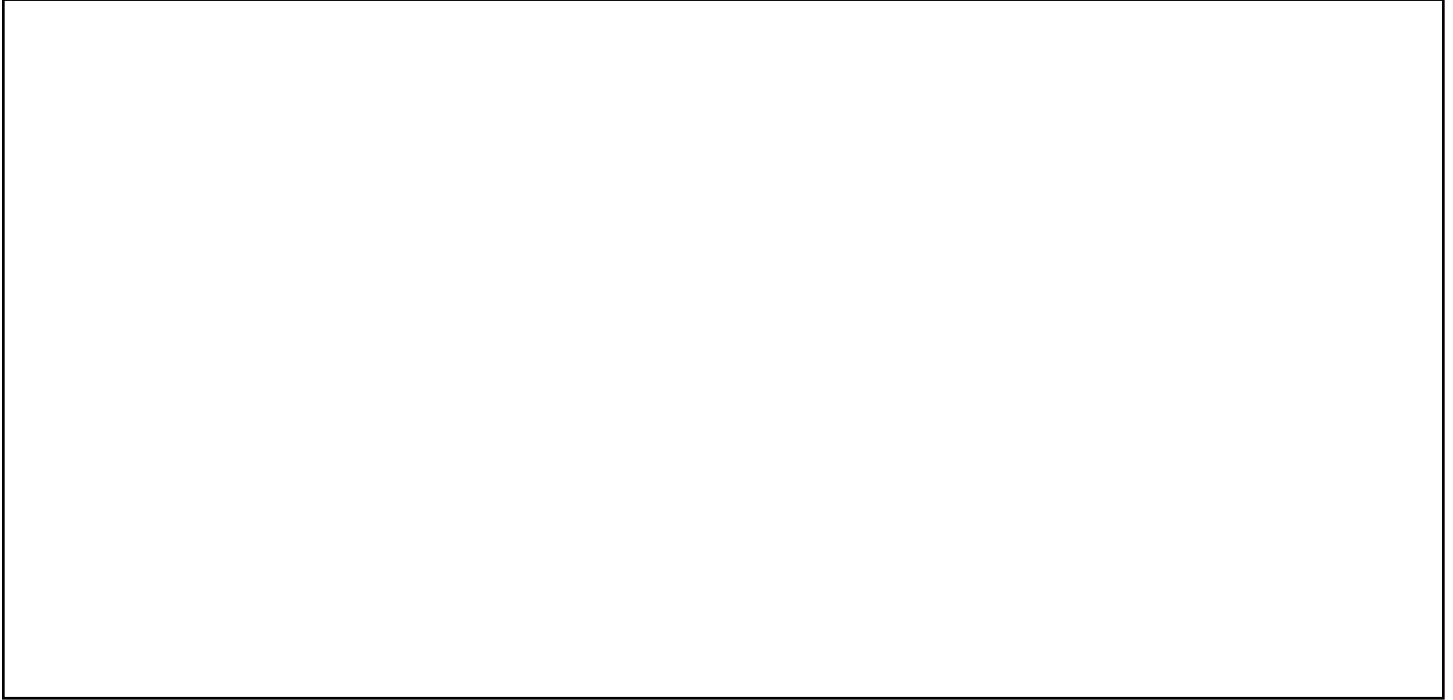

As you walk around the grounds, try to find something that fits each category below. Please remember to be gentle with our plants and not take them with you. You can capture memories with a camera or by sketching them!

## **Can you find...**

## Let's make art! Use the prompts below or get creative!

In this box, make a bark rubbing. You can do this by pressing the paper against the tree and gently scribbling on the paper with a pencil, crayon or marker to show the texture underneath.

In this box, draw a view of something far away, like the river. Try to imagine what it smells, feels, and looks like up close.
